

Join the Movement for Poison Free, Fossil Fuel Free, Organic Communities
For averting the 6th Mass Extinction & Climate Catastrophe
By REJUVENATING BIODIVERSITY, GROWING ORGANIC

A LETTER FROM DR VANDANA SHIVA

Dear friends in the Seed Freedom, Food Freedom, Earth Freedom movements,

Together we have prevented the Poison Cartel from establishing a monopoly over our seeds. We have not allowed them to make saving and exchanging of indigenous varieties bred by farmers illegal through patents on seeds and compulsory registration systems.

We have started seed banks and seed libraries everywhere. And we will continue to sow and grow seeds of freedom, seeds of hope.

The world is now waking up to the fact that the industrial food system is at the heart of the climate crisis and the extinction of species, it is at the root of hunger and the health crisis.

Everywhere in the world we are creating local, ecological food systems based on solidarity and circular economies and the law of return. That is why the Poison Cartel and the Agrifood Industry is trying to attack organic and local. But our movement for food democracy and food freedom is unstoppable.

We cannot stop because in the seeds we sow and the food we grow lies the possibility, promise and potential of averting the sixth mass extinction, climate catastrophe, the closure of our future and the future of life on Earth.

That is why I am inviting you to join me in creating "ever expanding, never ascending oceanic circles" that embrace and protect the last species, the last child by creating a Poison Free world by 2030.

Vandana Shiva
