

THE 3 PRINCIPLES OF EARTH DEMOCRACY

DIVERSITY

The imposition of uniformity and monoculture is the product of colonialism and extractivism and has directly led to mass extinction. The natural world needs a diversity of expression.

MAINTAINING THE COMMONS

Since life is a web based on interconnectedness, no part of nature belongs to one species.

LAW OF RETURN & RECIPROCITY

The regeneration of the Earth depends on us giving back to the Earth's natural cycles of nutrients, water and food.
